Stabilizing

Inguiring and looking with an open mind

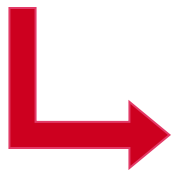

Sensing and Inquiring: Essentials

- Looking with an open mind (but not an empty head)
- Create relationships built on trust
- Look at problems from multiple perspectives
- Initial thoughts on issues
- Obtain understanding of relationships
- Determine position
- Tackle for closer understanding
- Diagnostic models

Sensing and Inquiring: Activities

- Analysing documents
- Business analyses
- Informal conversations
- Interviews
- Observations

Psychological contact and contract

Open communication about issues

Mutual understanding of change approach

Formal agreements on effort and costs

Search and future conferences

- Invite people who are engaged and motivated
- Jointly explore developments in environment
- Appreciate differences in perceptions
- Focus on a jointly desired future
- Pay attention to current and common values
- Give space for new ideas and possibilities
- Common understanding of history – past - future
- Encourage personal initiative and responsibility
- Translate ideas and initiatives into an action plan

Considerations from a dynamic View

- Looking at problems from multiple perspectives
- Relationships between problems
- First ideas about conflicts and tensions
- Why change is difficult
- Initial thoughts on solutions
- View on various perspectives
- Joint problem experience
- Create a basis of support for change
